Self Contained Sink Modules

The SM200 Sanitary Hand Wash Sink System

- Easy To Use
- ETL - Listed
- Professional

This system is specifically designed for locations where permanent plumbing is not available or is not cost effective to install. Perfect for food kiosks, outdoor catering, food sampling sites, etc. where sanitary requirements demand a hand wash sink. There are no permanent hook-ups required. Simply fill your fresh water holding tank, plug in the power cord and the unit is ready to go. Designed for hand washing only.

The durable 100% Stainless Steel cabinet is mounted on heavy-duty casters for portability. A full size seamless Stainless Steel lavatory sink offers easy and convenient access. Fresh water plumbing system is constructed of food grade tube and fittings. Equipped with "In-Line" water filter and check valve.

Features include a quick recovery, thermostatically controlled 2.5 gallon hot water heater, a five gallon fresh water and 2-5 gallon waste water holding tanks clearly marked to prevent interchanging. Fused demand water pump keeps your water pressure at a constant 45 lbs of pressure.
